

TACTILE GROUND SURFACE INDICATOR

AUSTRALIA'S MOST SLIP RESISTANT AND DURABLE CERAMIC TGSI

Colour reproduction from printing is indicative only

METZ[®]

**METZ CERAMIC TACTILE GROUND
SURFACE INDICATORS (TGSIs)**
are custom-made to the highest slip
resistance criteria, achieving ratings far
superior to any other product available
in Australia. Metz TGSIs achieve a
rating of P5 after 5000 cycles of
Accelerated Wear Testing (AWT).*

Many operators have experienced liability issues from slippery tactile indicators. Metz TGSIs are formulated with three essential slip resistance characteristics:

1. Abrasive media throughout the tile body mass
2. Textured surface on the raised indicators
3. Slip resistant finish on the whole tile (not just on the projections).

Metz tactiles feature:

- Full compliance with AS:1428.4.1
- Lasting slip resistance
- Hazard and directional versions
- Quality European porcelain.

300 x 300 format available in both:

 QUALITY EUROPEAN TILES

* Accelerated Wear Testing (AWT) is not possible on the raised profile of TGSi tiles due to the limited surface area. Metz has produced and tested the same product in a flat version, which achieved a slip rating of P5 after 5000 scrub cycles.
